

Collins College Now Offers Bachelor Degrees in Management

Collins College, a school of design and technology, has expanded its Bachelor degree programs. Collins College now offers a Bachelor of Science Degree in Management and a Bachelor of Science Degree in Applied Technology Management.

Tempe, AZ (PRWEB) May 25, 2005 -- Collins College, a school of design and technology, has expanded its Bachelor degree programs. Collins College now offers a Bachelor of Science Degree in Management and a Bachelor of Science Degree in Applied Technology Management. For more information about these new Bachelor Degrees, go to <http://www.collinscollege.edu/contactshort/index.asp?src=30557>.

“We started these Bachelor degree programs based on demographic research conducted by Collins College’s parent company, Career Education Corporation (CEC). After a long process, we are now able to offer two comprehensive bachelor degrees in management at an accelerated pace,” said JoAnn Moser, M.Ed., Program Chair, Management and Applied Technology Management.

Collins College is accredited by the Accrediting Commission of Career Schools and Colleges of Technology (ACCSCT). Collins College is licensed by the Arizona State Board for Private Postsecondary Education and has permits to accept enrollments from other states.

“Our management degree program is especially suited for working adults,” added Moser. Classes are held four nights a week, starting at 6:20 pm and ending at 11:00 pm. The program is on an accelerated schedule. Students can earn a Bachelor of Science Degree in Management in as little as 31 months. Individuals entering Collins with an associate degree can earn a Bachelor of Science Degree in Applied Technology Management in as few as 17 months.

Collins College accepts associate degrees from most accredited public and private educational institutions. The school also has articulation agreements with several private colleges and universities.

About Collins College

Collins College provides students with career-focused education in design and technology. Approximately 2,000 students from across the nation attend Collins College. Collins offers bachelor degrees in visual communication, graphic design, interior design, animation, game design, media arts, management, applied technology management, and network technology. Associate degrees are offered in visual communication, media arts and personal computer/network technology. All programs are designed to prepare students for entry-level positions in their degree areas. Collins has a main campus in Tempe and has a branch campus in Phoenix. Collins College was founded in 1978. The parent company is Career Education Corporation (CEC).
